Work Experience

No formal experience working on software development yet but looking forward to start making it. Here are some projects that shows my capabilities:

- <https://podcastchannel-pachioli.netlify.app>
It's a static SPA with links on the top bar that drives you to different parts of it.. It also has iframes of spotify podcasts and a responsive design.
<https://github.com/lorenzo-pachioli/podcastChannel.git>
- <https://reserva-de-alojamientos.netlify.app>
It's a booking page that works with a local list of lodgings and search options to filter the list showing the results remaining below.
<https://github.com/lorenzo-pachioli/reserva-de-alojamientos.git>
- <https://sprint-proyect-giphy.netlify.app>
It's a gif searching page that consumes an API from Giphy and uses a search engine with autocomplete suggestions of trending related topics.
https://github.com/lorenzo-pachioli/Sprint_proyect_Giphy.git
- <https://devsunited-pachioli.netlify.app>
It's a tweeter alike website using firebase as backend and react router for the different pages.
